

WEEE Collection and Recycling Arrangements in the United Kingdom

Nutanix's WEEE producer registration number in the UK is WEE/MM5989AA

Under the UK Waste Electrical and Electronic Equipment (WEEE) Regulations, for old equipment that you have bought before August 2005 which is being replaced on a one-for-one, like-for-like basis by the purchase of new Nutanix equipment, Nutanix is required to provide arrangements for the collection, treatment, recycling and recovery of the old equipment. The old equipment that your new purchase from Nutanix replaces is referred to as Historic WEEE

Under the UK WEEE Regulations, Nutanix is also required to provide arrangements for the collection, treatment, recycling and recovery of any new electrical and electronic equipment that you buy from Nutanix after August 2005, when that new equipment eventually becomes waste. This is referred to as New WEEE.

Nutanix products are very competitively priced. Any new increase in operating costs for manufacturers such as Nutanix is normally reflected in a price increase in the product. However, instead of increasing the prices of our products, Nutanix has decided to share these new environmental costs directly with our customers. We believe in being transparent with you on any new environmental costs that our products need to address. Our approach to sharing these new environmental costs is:

- Nutanix pays for the costs of treatment, recycling and recovery of the WEEE to meet the targets set by the WEEE Regulations;
- Nutanix pays for the costs of data management and reporting to the Environment Agency to demonstrate compliance with all administrative requirements of the WEEE Regulations;
- You pay for transportation of your WEEE to Nutanix's appointed recycler in the UK.

Nutanix has established a recycling contract with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of the equipment on arrival at the EARN recycling facility in the UK. All New WEEE that arises from the purchase of Nutanix products is classed as non-hazardous waste and does not contain Persistent Organic Pollutants (POPs) to class it as hazardous WEEE. As the waste holder, it is your responsibility to confirm that the waste Nutanix equipment has not become hazardous during the product use. For example, if the equipment has become contaminated during use, please follow the recommended decontamination procedure.

To comply with the UK Duty of Care Regulations the transport of your waste to the recycler must be accompanied by suitable documentation. You must also keep a signed copy of this documentation for two years.

It is your responsibility to arrange and pay for costs of collection and transportation to the recycler.

To request collection and transport of large amounts of WEEE please use the following link:
