

Enable a Modern Distributed Finserv Workforce

Make end user computing and thick edge scalable and simple.

Exceptional customer experiences rely on well-functioning, productive, and collaborative teams. The seamless use of data and technology is also essential, regardless of the desktop, device, or remote location. With a distributed workforce, financial services institutions (FSIs) cannot afford to make any concessions regarding security and compliance. To meet these demands, organizations must evolve by ensuring secure and consistent access to applications and data at scale, without adding unnecessary complexity.

Nutanix hybrid multicloud end user and edge solutions allows organizations to:

- ✔ Be highly responsive and able to react swiftly
- ✔ Empower every type of user within the enterprise
- ✔ Enable employees virtual access to applications and desktops
- ✔ Prevent data loss and theft from end-point devices in diverse environments
- ✔ Deliver effortless, portable, and performant access to data and applications
- ✔ Safeguard sensitive data

Increased Efficiency. Increased Profit.

An Intelligent, Agile Solution for Finservs. End User Computing Made Simple.

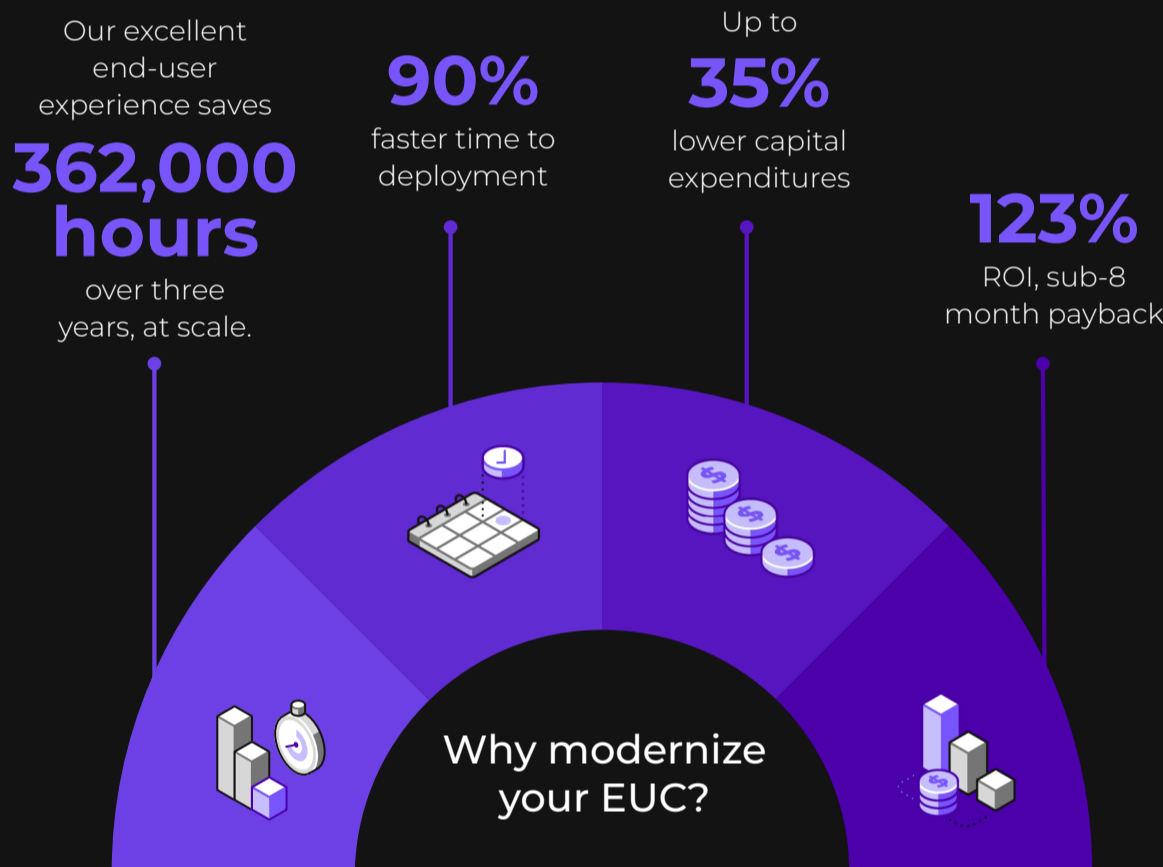

Nutanix End User Computing (EUC) is your bridge between data and insights for the financial services industry (FSI). Enable power users such as traders, wealth and asset managers, or lending agents to contact centers and operational staff.

Nutanix ensures constant, effortless, portable, and high-performing access to data and applications for your workforce, regardless of their location. By reducing workforce complexity, you can promptly react to changing needs, while maintaining an optimal user experience.

Nutanix products and solutions offer key benefits that help FSIs achieve an optimal cloud environment, including,

- ✔ **Application Compatibility:** Replicating the look, feel and performance for mission-critical systems, while enabling modern application development and deployment.
- ✔ **Adaptive:** Providing cloud or hybrid infrastructure as a service, along with integrations for on-premises to satellite offices and edge locations, spanning states, regions or globally.
- ✔ **Operational Resilience and BC:** Ensuring security, data and application protection, as well as high availability.
- ✔ **Ease of Deployment:** Embedded intelligent automation, administration, simplicity and transparency.
- ✔ **Rapid Scale Out:** Allowing for scaling of users, applications and storage.
- ✔ **Performance:** Supporting for power users, latency-sensitive functions, and front-office responsiveness.

Nutanix can meet the needs of your workforce, business, or technology, wherever they are.

An Ideal, Agile Platform for Diverse FinServ Cloud to Edge Needs

Empower bankers, advisors, agents, private equity professionals, and traders with advanced cloud data center capabilities across branch, edge, and remote locations. Streamline operations, boost performance, and conserve resources to cater to the most demanding edge and distributed user environments. Nutanix allows FSIs to scale up and scale down without sacrificing modernization goals.

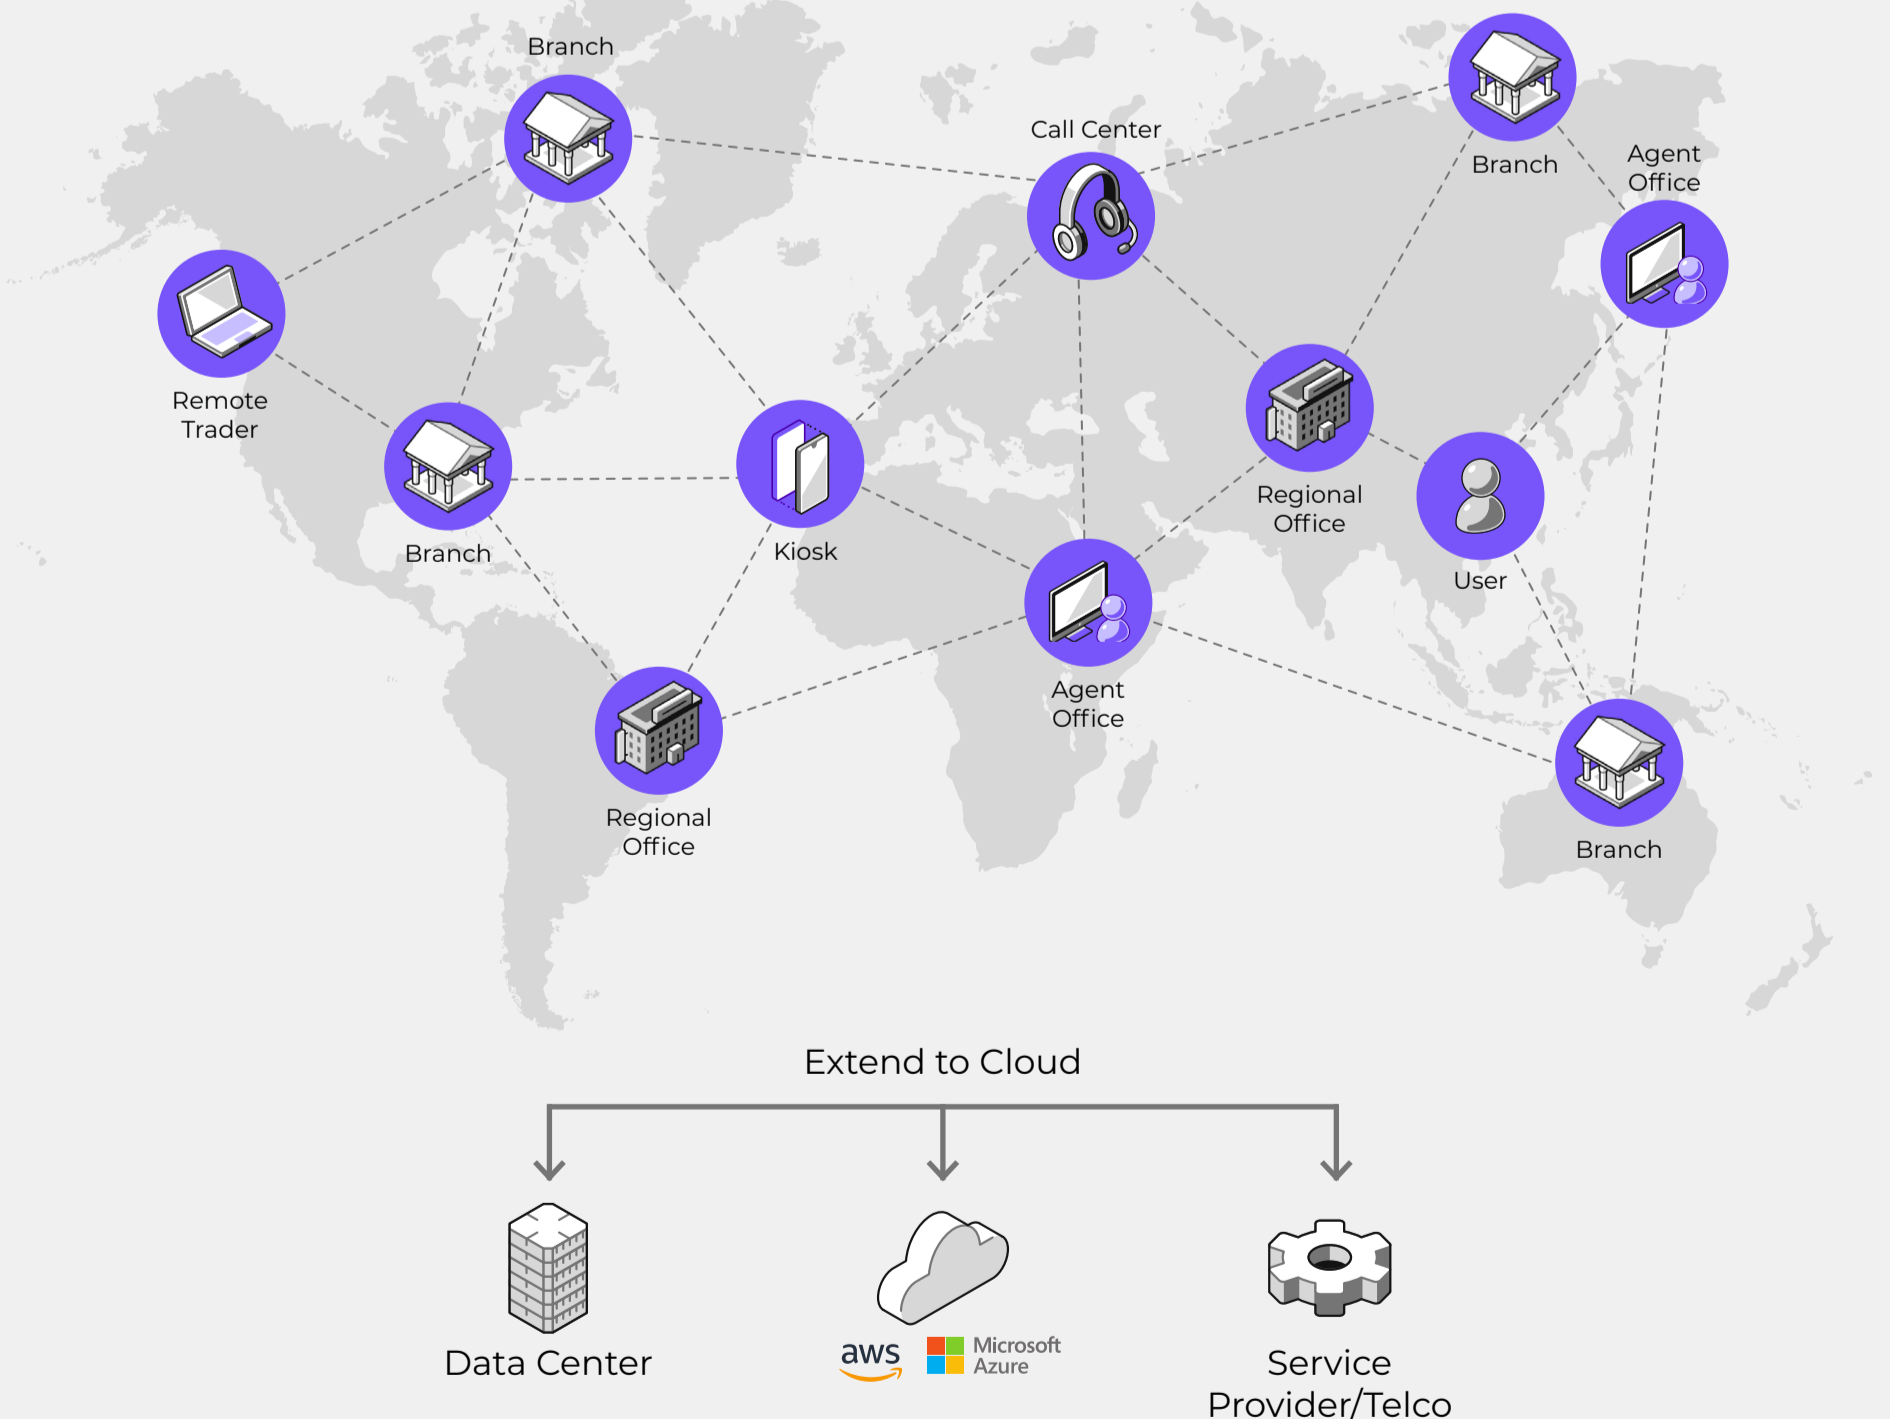

The Nutanix edge/ROBO (remote office/branch office), known as the cloud-in-a-box concept, provides all the digital capabilities needed at the 'enterprise edge'. The concept offers the required infrastructure to support your workforce from anywhere. Unlike other IT vendors, Nutanix simplifies infrastructure and application management by consolidating it into a single UI, eliminating multiple management consoles. This seamless approach enables efficient management of multiple locations without the requirement of local IT staff.

FSI Edge Goals

- Support critical transactions, applications, and intelligent applications
- Bank-in-box Cloud concept
- Distributed workforce modernization
- AI/ML decisioning
- Advanced data analytics
- De-risk from operational, geo, and regional outages
- Maintain localization needs: i.e. Data sovereignty for compliance

Technical Edge Goals

- Simplified management
- Resilient & hardened platform
- Reduced footprint
- Rapid & stand-alone deployment
- GPU support
- Data integrity & self-healing
- Secure by design
- Data protection, backup, and DR
- Zero-touch deployment

Choosing Nutanix as your strategic partner delivers:

- Simple and scalable end user computing and thick edge
- Data access and protection for applications
- Automation and simplicity
- Compliant and private data with high level security
- Adaptive disaster recovery
- Business continuity
- Desktop management

Make sure you meet the challenge of a distributed workforce by integrating Nutanix EUC and thick edge solutions. By leveraging Nutanix solutions, you can adhere to data sovereignty and data protection requirements without compromising digitization efforts or sacrificing hyper-local personalization of customer engagement.
